EXPERIENCE

Python Backend Developer | Lagran Software Solutions Pvt Ltd **Nov 2025 – May 2026**

- Built an e-commerce web application using **Python** and **Django** with user registration, login, logout, and home, product, product detail, about, and contact pages.
- Implemented the shopping cart with add-to-cart and quantity buttons on the product and product detail pages, a cart page with quantity control, a remove-item option, and an order total summary.
- Developed the checkout form and an order history page (via profile menu) showing customer name, address, country, state, and phone number.
- Enabled order shipping status tracking (Pending, Shipped, etc.), managed through **Django Admin**.
- Created a custom admin panel with a dashboard to manage customers, products, cart, orders, and the about and contact pages.
- Designed database models and handled migrations, queries, and CRUD operations using **Django ORM**.
- Converted Figma designs into responsive pages using **HTML**, **CSS**, and **Bootstrap**; added **JavaScript** form validation and used **Git/GitHub** for version control.

PROJECTS

The Daily Read – Multi-Page Blog Website | Next.js, React.js, JavaScript, CSS

- Built a responsive multi-page blog with **Next.js** and **React.js** featuring a home page, articles page with search, category filtering, and an about page.
- Used the **Next.js App Router** with dynamic routes (**/blog/[slug]** and **/categories/[category]**) for individual article and category pages.
- Created reusable components (navigation bar, article explorer) with shared global **CSS** styling; used **Git/GitHub** for version control.

Hospital Management System | React.js, Vite, Tailwind CSS, Django, DRF, PostgreSQL, JWT

- Developed a full-stack system to manage patients, doctors, and appointments with full CRUD operations.
- Built REST APIs using **Django REST Framework** and integrated them with the **React.js** frontend using **Axios**.
- Implemented **JWT** authentication and a responsive dashboard using **React.js** and **Tailwind CSS**.
- Managed data with **PostgreSQL** and **Django ORM**; used **Git/GitHub** for version control.

RecipeHub – Recipe Search Web Application | React.js, JavaScript, Spoonacular API, CSS

- Developed a recipe search app with recipe details, ingredients, and cooking instructions using **React.js**.
- Integrated the **Spoonacular REST API** and managed dynamic data with **useEffect** and state management.
- Secured the API key using **environment variables**.

Smart Expense Tracker API | Python, Django REST Framework, MySQL

- Developed **REST APIs** with **Django REST Framework** and **MySQL** to add, view, filter, and delete expenses by category.
- Implemented total and category-wise expense calculations using **Django ORM** and **SQL**.
